***Election/Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 29, 32-50, and 83-108 drawn to auxiliary spectacle attached to a primary spectacle, classified in class 351, subclass 47.

Group II. Claims 59-82, drawn to a split rim mounting, classified in class 351, subclass 90.

2. The inventions are distinct, each from the other because of the following reasons: Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the patentability of the combination does not rely on the detail of the subcombination (see evidence claim 29). The subcombination has separate utility such lens mounting.

Art Unit: 2873

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the fields of search are not coextensive, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. If Group I is elected, then an election of species, as set forth below is required.

This application contains claims directed to the following patentably distinct **species** of the claimed invention:

A) Claims 29, 32-50 and 83-89 drawn to auxiliary spectacle attached to a primary spectacle with lens mounting.

B) Claims 90-106 drawn to auxiliary spectacle attached to a primary spectacle.

C) Claims 107 and 108 drawn to auxiliary spectacle attached to a primary spectacle with specific shape of the bore for receiving the magnetic member.

Art Unit: 2873

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the

inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
